

# ACKNOWLEDGEMENTS

---

The process of developing this updated point guide was an incredible learning experience for both of us, and we could not have done so without the knowledge, guidance and support of our professors, mentors, colleagues and the experts who assisted us at every stage of this project.

We would like to express our deep appreciation to:

The Indigenous peoples, past and present, of the land now known as Ontario. It has been an honour and privilege to work with these objects and witness the skill of Indigenous artisans. We acknowledge the ongoing connection that living Indigenous communities have to the belongings of their ancestors.

Dr. Tristan Carter, Chair of McMaster University's Anthropology department, for facilitating and supervising this project, providing the lab space and equipment for photography, and putting his faith in us to create this document for future students.

Dr. Scott Martin, Operations Manager at Sustainable Archaeology McMaster, for his facilitating our access to materials and artifacts housed at Sustainable Archaeology McMaster, providing lab space and equipment, and for generously providing his time and knowledge of the collections and of Ontario archaeology and lithics.

Melissa Dunham, Instructional Assistant in the Archaeology Teaching Laboratory for her support and providing access to the McMaster archaeological teaching collection, instruction in general photography and in artifact documentation, and for her continual advice and guidance throughout the course of this project.

Amy Dallaway, one of our colleagues and fellow student volunteers in the Archaeology Teaching Laboratory, for laying the groundwork for this project with her hard work in processing, organizing and cataloguing the projectile point collection within the Teaching Lab over the last two years. Without her instrumental volunteer work, advice and feedback on our project, this would not have been possible.

Dr. Heather Hatch, Collections Manager at the Museum of Ontario Archaeology, for her assistance in providing access to the lithics collection at the Museum of Ontario Archaeology, and for providing space to document and photograph the artifacts housed at the Museum.

Dr. Chris Ellis, Professor Emeritus at the University of Western Ontario Sustainable Archaeology, for providing access to part of Western University's archaeological teaching collection, and for sharing his knowledge and guidance in all things related to Paleoindigenous projectile points.

Dr. John Creese, Vettoretto Curator of North American Archaeology at The Royal Ontario Museum, for his assistance in facilitating our access to the Royal Ontario Museum's Paleoindigenous projectile point collection.

April Hawkins, Collections Specialist in Archaeology of the Americas at The Royal Ontario Museum, for her assistance, support and for spending the day with us documenting and photographing the Paleodindigenous points within the North American Archaeology collection.

Finally, this project would not be possible without the decades of research, excavation and dedication by archaeologists that came before us. This updated guide builds directly off of their hard work, laying the foundations for Ontario Archaeology as we experience it today. We owe them, and everyone who was a part of this project with us, an immense debt, and we hope that this updated Projectile Point Reference Guide can make them and all those who supported us proud.

Rosalie Swenor & Ricardo Bonilla Diamond
